Docket No. GJE-87 Serial No. 10/081,599

In the Claims

This listing of claims will replace all prior versions and listings of claims in this application.

l (Currently amended). An artificial chromosome comprising [[a]] <u>the 1.3 kb</u> polynucleotide sequence <u>from position 5885 to 7185</u> between $C\delta$ and $C\gamma3$ of the human IgH locus, wherein said polynucleotide sequence exerts regulatory control on immunoglobulin gene activation during lymphoid development.

2 (Original). The chromosome according to claim 1, selected from the group consisting of bacterial, yeast, eukaryotic and mammalian chromosomes.

3 (Previously presented). The chromosome according to claim 1, which includes a polynucleotide sequence encoding a transcription-binding factor.

4-15 (Cancelled).
